

Nama : Andri Firman Saputra

NIM : 201011402125

Kelas : 02TLP023

Tugas : Algoritma II – Tugas Terstruktur – Pertemuan 5

The screenshot shows a C++ IDE with two windows. The left window, titled 'length char.cpp', contains the following source code:

```
1 #include<iostream>
2 #include <cstring> // untuk function strlen
3 using namespace std;
4
5 int main()
6 {
7     char *nama = "Andri Firman Saputra";
8     cout<<strlen(nama);
9 }
```

The right window, titled 'D:\Documents\File Dev C++\length char.exe', shows the execution output:

```
20
-----
Process exited after 0.05966 seconds with return value 0
Press any key to continue . . .
```

Source code:

```
#include<iostream>
```

```
#include <cstring> // untuk function strlen
```

```
using namespace std;
```

```
int main()
```

```
{
```

```
    char *nama = "Andri Firman Saputra";
```

```
    cout<<strlen(nama);
```

```
}
```
