Fak./Jurusan	: Teknik Informatika	Waktu	: 08:50
Dosen	: Sulasih, S.S., M.Pd	Shift	: <b>Reguler A</b>
Semester	: 3	Sifat Ujian	: <b>Tutup Buku</b>

### I. Read the text and answer the following questions (20 points)

#### A Computer game version

The last improvement of technology has resulted various tools and sophisticated electrical devices that help human work. They make life easier and more practical. We become more dependent on them. Can we live without them?

You must have been familiar with this game. This game originally consists of a board and little squares with one letter printed on their sides.

This game can be the means to test your English vocabularies. Now its presence on PC can be a new challenge for you. You can choose the skill levels in scrabble novice and expert.

The rules are the same as those in the original game. But in this computer version there is extra bonus – a kind of direction – which will help you to place the letter squares correctly.

This game also provides directions for what you need to find when you play it again later on. If you want to run it by yourself, there is a ten-thousand-word dictionary that can help you when you try to find difficult words of high score containing Q, Z, and X. A kind of mini game is also provided to sharpen your intelligence, focusing on anagram and puzzle.

Scrabble is successful as a single player game. It's worth giving double thumbs appraisal proves that conversion to computer doesn't have to be followed by the 3 B graphic and is still interesting to play.

Create five questions based on the text above

1. What is the purpose of Computer game?
2. What are the challenges of Computer game?
3. What if our life didn't exist version of computer game?
